- Enhanced image

## PnS ConfidenceMail: Architecture

**PnS Concept** solutions are based on open and reliable technology. They use the best of data processing, network and communication technologies.

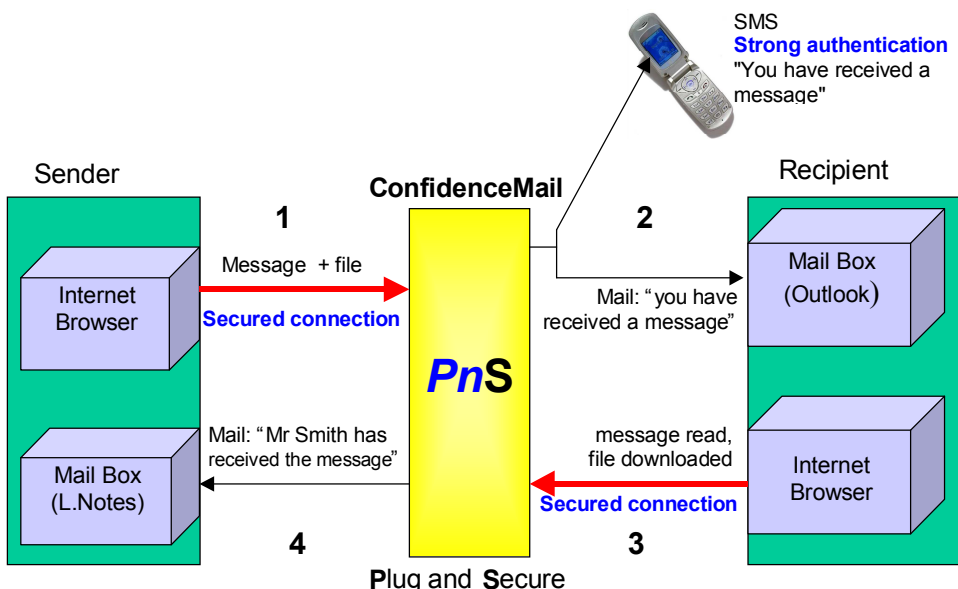

**ConfidenceMail** is compliant with this concept.

Data encryption is compliant with SSL 128 bits encoding.

**Sensitive data** are **never** sent **unencoded**. Passwords are not stored unencoded. A unique and temporary code is sent by SMS on the mobile of the user connecting in **strong authentication** mode.

Your **ConfidenceMail** solution is **Plug and Secure®** certified: an unmatched integration time, and the assurance of secured connection as soon as it is plugged.

**PnS ConfidenceMail** is at the heart of **PnS Pack**. With a rarely seen ease of use, it is compatible with all the market Internet browsers, and requires no local installation or configuration.

## ConfidenceMail: Integration and evolutions

**ConfidenceMail** is designed to be your communication tool. Logos and colours are compliant with your graphic charter. After a study of your environment and your needs, the configured application is installed in your company by our personnel.

**Administration** of **ConfidenceMail** is **simple**, and is done in your usual Internet browser. It is of course done in secured mode.

**ConfidenceMail** allows administrators to survey communication and system logs.

## ConfidenceMail

*"How networks interconnection, the global network - is modifying security demands? What are the new threats on our information systems since Internet services are open to 'general public'? These are questions that nobody, especially not a manager, can ignore."*

(Robert Longeon, Jean-Luc Archimbaud  
In charge of Information Systems security at CNRS)

Your mailboxes or those of your correspondents are cluttered, you data exceed the allowed space? **ConfidenceMail** puts you back in control of your transfers.

Your company **data** is **business-critical**. **ConfidenceMail** is your guaranty your transmission is confidential and reliable.

## Raise personnel and partners awareness on security

**ConfidenceMail** adds value to your professional image inside and outside your company.

Your company data are priceless.

**PnS ConfidenceMail** protects them and raises all actors awareness on their importance and on the necessity of security.

*now you can trust the Internet®*
